

THEA SAGUID

Singapore | +65 8820 0961 | th.saguid@gmail.com | GitHub

SUMMARY

Computer Science graduate (University of Wollongong / SIM) with a double specialisation in Cybersecurity and Digital Systems Security. Hands-on experience building cross-platform mobile apps, full-stack web systems, and security tools using Python, JavaScript, React Native, and Docker. Hackathon award winner with demonstrated ability to ship working products under pressure. Seeking software engineering, cybersecurity, or digital forensics roles in Singapore.

EDUCATION

University of Wollongong — Singapore Institute of Management

Bachelor of Computer Science — Cybersecurity & Digital Systems Security

Coursework: Cryptography & Secure Apps, Network Security, Web Security, Systems Security, Cybersecurity, Ethical Hacking, AI & Cybersecurity, Algorithms & Data Structures, Database Systems

Expected September 2026

AWARDS & CERTIFICATIONS

SIM ITC HackXperience 2026 — Best Entrepreneurial Award2026

Won best entrepreneurial project at a 24-hour hackathon (100+ participants) for building an agentic solution that automates workplace friction points.

SIM ITC HackXperience 2026 — Runner-Up, Friction to Flow Track2026

Placed 2nd for technical execution and innovation in the Friction to Flow track, recognised for outstanding creativity during a 24-hour sprint.

National AI Student Challenge (NAISC) 2026 — Certis Track2026

Built multimodal AI solutions for real-world security operations (video, audio, sensor data) at Singapore's national AI competition organised by AI Singapore.

L'Oréal Brandstorm 2026 — Global Innovation Competition2026

Competed in L'Oréal's worldwide innovation challenge, pitching a tech-driven luxury fragrance concept to industry judges.

PROJECTS

POLICYLENSJul 2026 (Hackathon)

Lead Back-End Developer | Python, FastAPI, Supabase, PostgreSQL, pgvector, Azure AI Foundry

- Built an AI-powered contract review platform in 24 hours that extracts key clauses (liability, payment, SLAs) and benchmarks them against company policies and a full library of signed contracts using RAG retrieval with pgvector embeddings.
- Engineered the FastAPI backend with Supabase/PostgreSQL, implementing vector similarity search (match_policy_clauses / match_contract_clauses RPCs) to detect policy violations and precedent breaks across historical agreements, surfacing risk-scored drift reports with cited sources.

WEBLINK SCANNERJan – May 2026

Team Lead & Back-End Developer | React Native, Node.js, Express.js, PostgreSQL, Playwright

- Built a cross-platform mobile security app that scans URLs via camera or manual input, integrating VirusTotal and Google Safe Browsing APIs to detect phishing and malware threats before user exposure.
- Engineered a Node.js/Express.js backend with PostgreSQL and Gemini AI to deliver consolidated risk scores and safety verdicts, reducing user vulnerability to web-based attacks.

CSR VOLUNTEER MATCHING PLATFORMOct – Nov 2025

Team Lead & Full-Stack Developer | PHP (OOP), MySQL, Agile/Scrum

- Developed a full-stack web application matching CSR volunteers with Persons-in-Need, streamlining outreach and reducing manual coordination effort for partner organisations.
- Led a 4-person Agile Scrum team through weekly sprints and client feedback sessions, delivering a complete design-to-deployment workflow on schedule.

TECHNICAL SKILLS

Languages: Python, C++, C, Java, JavaScript, TypeScript, PHP, SQL, Bash, HTML/CSS
Frameworks: React, React Native, Expo, Next.js, Node.js, Express.js, FastAPI, REST APIs, JWT
Databases & Cloud: MySQL, PostgreSQL, MongoDB, Supabase, Firebase, Railway, Vercel, Azure AI Foundry
Security & Tools: Docker, Playwright, Git/GitHub/GitLab, Linux, VMware, VirtualBox, Cisco Packet Tracer, Wireshark
Practices: CI/CD (GitHub Actions, GitLab CI), Agile/Scrum/Kanban, TDD, Unit Testing, REST API Design
Design: Figma, Wireframing, Prototyping, Responsive Design

SOFT SKILLS

Leadership & Teamwork: Team Leadership, Cross-Functional Collaboration, Mentoring, Conflict Resolution, Delegation
Communication: Technical Writing, Presentation Skills, Stakeholder Communication, Active Listening, Documentation
Work Ethic: Time Management, Adaptability, Initiative, Attention to Detail, Reliability, Self-Motivation
Problem Solving: Critical Thinking, Analytical Reasoning, Decision Making, Creative Problem Solving, Root Cause Analysis
